(71)Applicant : IDEMITSU KOSAN CO LTD

(22)Date of filing : 19.04.2002

(72)Inventor : IKEDA HIDEJI  
FUNAHASHI MASAKAZU  
MATSUURA MASAHIDE(54) NEW ANTHRACENE COMPOUND AND ORGANIC ELECTROLUMINESCENT ELEMENT UTILIZING  
THE SAME

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain an organic electroluminescent element having high luminous brightness and luminous efficiency in an extremely low voltage and excellent in heat resistance and long life, and a new anthracene compound realizing the element.

SOLUTION: The new anthracene compound has a diphenylanthracene structure in the center and has a specific structure substituted with an arylamine group at the end. In the organic electroluminescent element forming a luminous layer or a plurality of organic compound thin films containing the luminous layer between a pair of electrodes, at least one layer of the organic compound thin film comprises the new anthracene compound.

## LEGAL STATUS

[Date of request for examination]

05.11.2004

[Date of sending the examiner's decision of rejection]

[Date of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
